

Steps to Create Actions

Creating Custom Pack with Custom Actions

NarendraP

Steps to Create Actions

- Actions has to create under a pack
- Actions are made up of two files
- They are:
 - Action Meta Data file or yaml file
 - Script (Shell/Python/or any other) – **optional**
- Script will have our logic and meta data file/Yaml file will have the info about an action.
- We know how to write a script (shell or python Script).
 - Script should return valid exit code/status
 - Should return valid stdout and stderr
- How to write Yaml file or meta data file for an action ?
 - <https://docs.stackstorm.com/actions.html>

Thank you
